INTERNXT

The most secure cloud storage for your business

Internxt is built with powerful zero-knowledge, post-quantum encryption, providing everything you need to protect your business from data loss.

Company overview

Founded in 2020
in Valencia, Spain

Over 300,000
active users trust us to secure their confidential data

Internxt specializes in protecting businesses from data breaches. With Internxt, companies can operate confidently, knowing their data remains encrypted, confidential, and compliant with modern privacy standards.

Key challenges businesses face

Each year, businesses struggle to meet increasingly complex security requirements and the growing demand for scalable, flexible storage solutions.

Other cloud providers may encrypt your data, but they hold the keys, presenting risks to your privacy.

The global average data breach cost is of €4M per company.

Key challenges

Data breaches

The average cost of a data breach surged to €4M in 2024. Companies are struggling to keep their data private and secure from ransomware, phishing, and hackers.

Regulatory compliance

Meeting stringent regulations like GDPR is a complex and ongoing challenge. Non-compliance can result in hefty fines and legal issues.

Data accessibility for a distributed workforce

With the rise of remote and hybrid work, businesses need secure, accessible storage solutions that support a distributed workforce without compromising data security.

Who can we help?

Using Internxt's encrypted services, companies in these sectors can protect their data and lower the financial losses they experience from a data breach.

Average cost of a data breach by industry

- **Healthcare**
  €9 M
- **Financial**
  €6 M
- **Industrial**
  €5 M
- **Technology**
  €5 M
- **Energy**
  €5 M
- **Pharmaceuticals**
  €5 M

Our solution

Our platform provides end-to-end encryption, protecting your business data at rest and in transit.

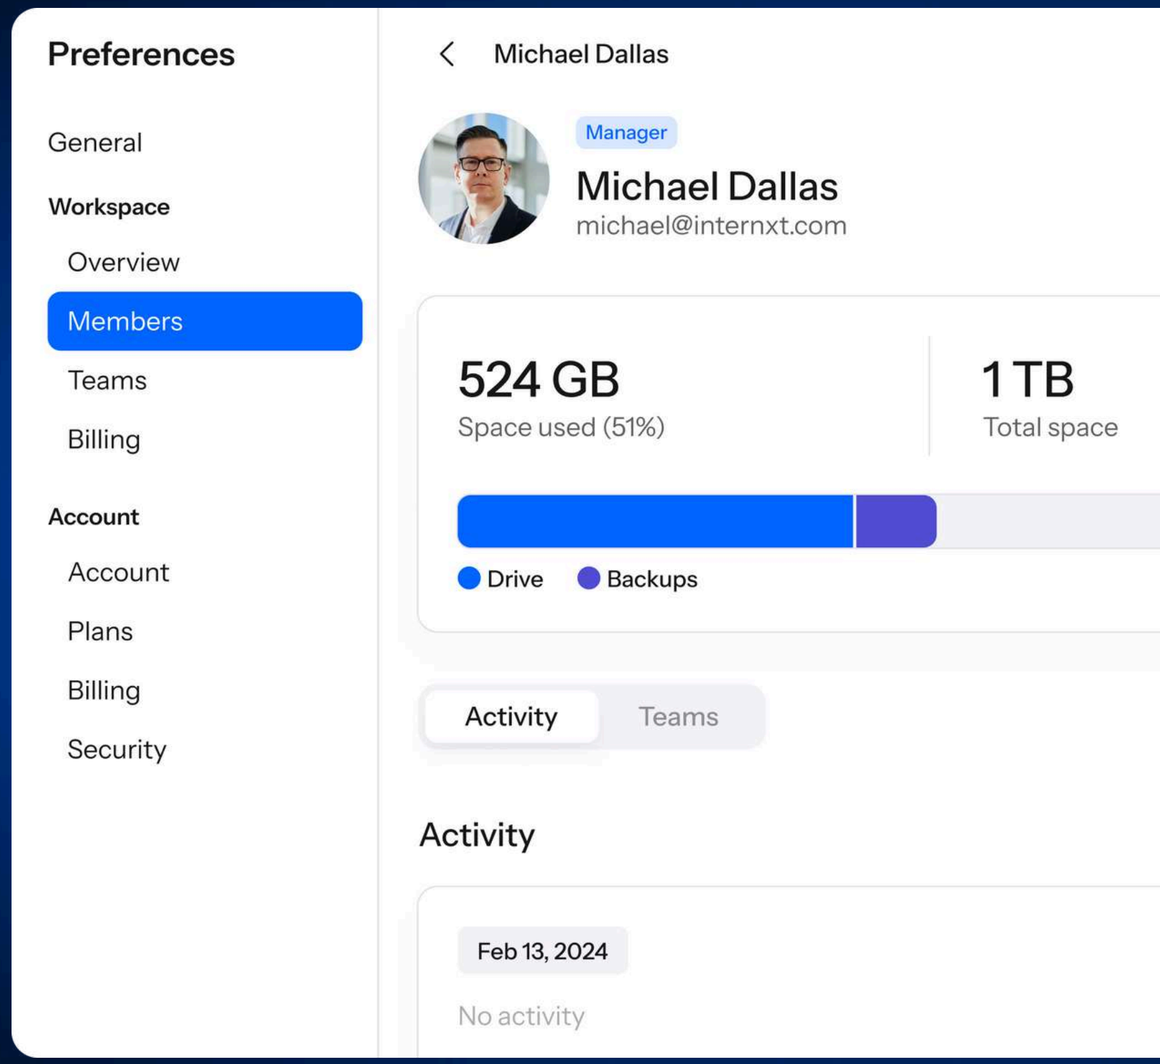
We offer true data privacy — we don't have access to your business information. Your data is fully encrypted and accessible only to you.

How we provide the solution

Post-Quantum Encryption: Ensures your business data is protected at rest and in transit using the most powerful encryption standard available.

Data Backup and Recovery: Provides reliable backup and swift recovery options to protect against data loss and ensure businesses experience zero downtime.

Zero-Knowledge Policies: These policies are in place for employees, clients, or partners and cannot be bypassed—not even Internxt can view or access your information.



How we can help your business

Internxt for Business provides comprehensive solutions for file management, security, and privacy. Our platform equips your team with the tools to collaborate securely between teams. Our features:

> **Account Management:** Manage members of your organization, customize workspaces, and monitor your account billing and payments.

> **Secure File Sharing:** Password-protect and restrict file access to send confidential files with partners. Files are fully encrypted on your device for maximum security and privacy.

> **Session Management:** Detailed session monitoring (client, OS, IP, location, last active time) detects unauthorized access and protects sensitive data.

> **Flexible Storage:** Add and allocate a member's storage based on specific needs. You can upgrade your storage whenever necessary for a scalable, affordable, efficient cloud experience.

Object Storage

Internxt also provides private and affordable object storage for businesses and enterprises using the S3 protocol to store, access, and manage large-scale data.

€6.99 TB / mo

- √ 80% more affordable than AWS
- √ Zero hidden fees
- √ Free data transfer
- √ API compatible with AWS
- √ GDPR compliant
